

Oleg Dzyadovich

Software QA Lead · Cross-Platform Networked AV · AI-Augmented QA Automation

Sacramento, CA | (619) 471-6220 | olegdzyadovich@gmail.com | [linkedin.com/in/oleg-dzyadovich](https://www.linkedin.com/in/oleg-dzyadovich) | olegdzyadovich.github.io

Professional Summary

Software QA Lead Engineer with 7+ years in QA, currently owning release-candidate ship-gates for cross-platform networked AV products spanning firmware, Mac/Windows, Web, iOS, and Android. Sole QA owner of 2 concurrent product lines, leveraging AI-augmented automation (Claude AI, GitHub Copilot). Playwright and Pytest automation; Scrum Master certified.

Work Experience

Biamp Systems | Beaverton, OR

Software QA Lead Engineer | January 2025 – Present

- Own release-candidate ship-gate decisions for 2 concurrent product lines (room-control conferencing platform + professional audio endpoint platform) across firmware, Mac/Windows desktop, Web, iOS/Android, peripherals
- Automated routine QA work via Claude AI (Anthropic) and GitHub Copilot integration — bug-report drafting, Xray test-charter generation, exploratory coverage analysis, Playwright/Python automation scaffolding — freeing capacity to take on a second product line and double QA coverage delivered by a single Lead
- Author and maintain Xray test-case libraries spanning regression, integration, and exploratory scenarios across both product lines
- Triage release-blocking defects across firmware, web, mobile, and peripheral engineering teams; route, reproduce, and verify fixes on critical-severity issues
- Facilitate Agile/Scrum ceremonies for a 6-person engineering team while owning hands-on QA execution

Software QA Engineer | February 2022 – January 2025

- Validated networked AV systems end-to-end across 4 product platforms (rotated as projects shipped) — room-control conferencing, professional audio endpoint, AV network management, audience engagement mobile platform — covering firmware, Mac/Windows desktop, Web, iOS/Android, USB camera peripherals
- Designed test plans across regression, integration, system, and session-based exploratory scenarios
- Built and maintained Playwright (JavaScript) and Pytest (Python) automation for regression and smoke-test workflows integrated with CI/CD pipelines
- Investigated intermittent, recovery-sensitive defects — session drops, peripheral enumeration race conditions, real-time media corruption, platform-specific crashes — partnering with engineering on root-cause analysis

Adamant Systems | San Diego, CA

Software QA Engineer | March 2019 – February 2022

- Conducted manual, exploratory, functional, regression, and API testing (REST, Postman) across web and mobile applications
- Collaborated with offshore Agile teams on sprint planning, defect prioritization, and release management
- Authored QA documentation — test plans, checklists, traceability matrices, and release notes
- Led root-cause analysis and defect triage on production-impact issues

Kuehne-Nagel & Fastrucking LLC | San Diego, CA & Kyiv, Ukraine

Logistics Specialist | September 2008 – February 2019

- Designed a logical database for existing business processes and collaborated with 10+ cross-functional teams on on-time, on-budget deliverables

Skills

Testing Types: Manual, Exploratory (session-based), Functional, Regression, Integration, System, Smoke, Sanity, Acceptance (UAT), End-to-End, API (REST/SOAP)

Test Process: Test Planning, Test Case Design, Traceability Matrix, Defect Lifecycle, Root-Cause Analysis, Release Validation, Risk-Based Testing

Methodologies: Agile (Scrum, Kanban), SDLC, STLC, CI/CD, Context-Driven Testing (Rapid Software Testing)

Domain: Networked AV, Hardware-Software Integration, Firmware, Embedded Systems, Cloud-Connected Devices

Technologies

Languages: JavaScript, Python, SQL

AI Tools: Claude AI (Anthropic), GitHub Copilot

Test Tools & Frameworks: Playwright, Pytest, Selenium WebDriver, Postman, JMeter, Charles Proxy, Fiddler, Chrome DevTools, BrowserStack, Android Studio, TestFlight

Source Control: Git, GitHub, Bitbucket

Databases: MySQL

PM & Test Management: Jira, Xray, TestRail, Confluence

OS / Platforms: Windows, macOS, Linux, Android, iOS

Education

Coursework in Management | International Humanitarian University

Certifications

Scrum Master Certification | Scrum Alliance

Course in Python Selenium Automation | QA School
